

Contents

Chapter 1	General	1
Chapter 2	Terms and Symbols	2
2.1	Terms	2
2.2	Symbols	3
Chapter 3	Basic Requirements of Seismic Design	6
3.1	Category and Criterion for Seismic Precaution of Buildings	6
3.2	Earthquake Strong Motion	6
3.3	Site and Base	7
3.4	Regularity of Building Configuration and Structural Assembly	8
3.5	Structural System	11
3.6	Structural Analysis	12
3.7	Nonstructural Components	13
3.8	Isolation and Energy-Dissipation	14
3.9	Materials and Construction	14
3.10	Performance-Based Design of Buildings	15
3.11	Strong Motion Observation System of Buildings	17
Chapter 4	Site, Soils and Foundation	18
4.1	Site	18
4.2	Foundations on Soil	21
4.3	Liquefaction and Soft Soils	23
4.4	Pile Foundations	28
Chapter 5	Earthquake Action and Seismic Checking for Structures	31

5.1	General	31
5.2	Horizontal Earthquake Action	35
5.3	Vertical Earthquake Action	41
5.4	Checking for Strength	42
5.5	Checking for Deformation	43
Chapter 6 Multi-story and Tall Reinforcement		
	Concrete Buildings	48
6.1	General	48
6.2	Essentials in Calculation	54
6.3	Details for Frame Structures	60
6.4	Details for Wall Structures	66
6.5	Details for Frame-Wall Structures	69
6.6	Requirements for Slab-Column-Wall Structures	70
6.7	Requirements for Tube Structures	72
Chapter 7 Multi-story Masonry Buildings and Multi-story		
	Masonry Buildings with R. C. Frames on	
	Ground floors	74
7.1	General	74
7.2	Essentials in Calculation	79
7.3	Details for Multi-story Brick Buildings	84
7.4	Details for Multi-story Concrete Block Buildings	89
7.5	Details for Multi-story Masonry Buildings with R. C.	
	Frames on Ground Floors	91
Chapter 8 Multi-Story and Tall Steel Buildings		
8.1	General	96
8.2	Essentials in Calculation	98
8.3	Details for Steel Frame Structures	104
8.4	Details for Steel Frame-concentrically-braced Structures	107
8.5	Details for Steel Frame-eccentrically-braced Structures	109
Chapter 9 Single-story Factory Buildings		
		112

9.1	Single-story Factory Buildings with R. C. Columns	112
9.2	Single-story Steel Factory Buildings	123
9.3	Single-story Factory Buildings with Brick Columns	130
Chapter 10	Large-span Buildings	135
10.1	Single-story Spacious Buildings	135
10.2	Large-span Roof Buildings	138
Chapter 11	Earth, Wood and Stone Houses	143
11.1	General	143
11.2	Unfired Earth Houses	144
11.3	Wood Houses	146
11.4	Stone Houses	147
Chapter 12	Seismically Isolated and Energy-Dissipated Buildings	149
12.1	General	149
12.2	Essentials in Design of Seismically Isolated Buildings	150
12.3	Essentials in Design of Energy-dissipated Buildings	156
Chapter 13	Nonstructural Components	160
13.1	General	160
13.2	Essentials in Calculation	160
13.3	Essential Measures for Architectural Members	162
13.4	Essential Measures for Supports of Mechanical and Electrical Components	166
Chapter 14	Subterranean Buildings	168
14.1	General	168
14.2	Essentials in Calculation	168
14.3	Details and Anti-liquefaction Measures	170
Appendix A	The Earthquake Intensity, Basic Accelerations of Ground Motion and Design Earthquake Groups of Main Cities in China	172
Appendix B	Requirements for Seismic Design of High	

	Strength Concrete Structures	218
Appendix C	Seismic Design Requirements for Prestressed Concrete Structures	220
Appendix D	Seismic Design for the Core Zone of Column-beam Joint of Frame Structures	222
Appendix E	Seismic Design for the Transition-stories	226
Appendix F	Seismic Design for R. C. Block Buildings	228
Appendix G	Seismic Design for Composite Steel Brace and Concrete Frame Structures and Composite Steel Frame and Concrete Core Tube Structures	237
Appendix H	Seismic Design for Multi-story Factory Buildings	241
Appendix J	Adjustment on Seismic Effects for the Transversal Bent of Single-story Factory	249
Appendix K	Seismic Check for Single-story Factory in Longitudinal Direction	253
Appendix L	Simplified Calculation, General and Details for Seismically Isolated Masonry Structures	259
Appendix M	Objectives and Procedures of Performance-Based Seismic Design	265
	Explanation of Wording in This Code	272
	List of Quoted Standards	273
	Addition; Explanation of Provisions	275
